## PROTEZIONI

Protezioni creates picture windows and glass doors, fixed and movable roofing, tunnels and pyramids. Advanced technology and dedicated care to details enable this company to offer high quality products and flexible solutions which satisfy a variety of requests of the customers. The products are made by using superior material that is light and resistant, and can be installed anywhere with ease, thus offering safe and stylish solutions which enhance the attractiveness and the comfort of the outdoor spaces rendering them liveable throughout the whole year.

## RESSTENDE

The highlight of Resstende at Made is represented by Laylight: its motto "arredare con classe - emozionare con la luce (Design with style, emotions through light)" introduces a new way of conceiving screenings as furnishing elements. All the models belonging to the Lineo and Sintesi collections, included in the Laylight range, meet all installation needs and feature high functionality and finishing quality. Whether in polished and chromed satin-finished aluminium or in wood, these valuable accessories enhance the environment and, together with textiles, turn into authentic furnishing elements able to give a touch of style to all living and sleeping areas. Resulting from a combination of the conception of fabric as a furnishing element with its use as technical sun screening, the entire Laylight range of fabrics is specially and uniquely designed and manufactured based on the experience of the leading Italian weavers, providing for a perfect synthesis between creativity and functional solutions.
